

# **BMD's Tropic 14**

**Introducing another very 'do-able' Mark Bowdidge DIY Project just about anybody can afford - and what a ripper, all-round fishing family boat comes out of the garage in just a couple of month's time!**

**N**o matter what species of fish you're chasing, with the Tropic 14, you're hooked. Whether you're river/ lake or estuary fishing or just having fun, the Tropic 14 is in a class of its own.

Easy on the pocket and packed with features, the Tropic 14 is an ideal mid size family / multi-species fishing boat. The heart and soul of the Tropic 14, although engineered for exceptional beam to beam stability in the most demanding conditions, her modified-V hull (not flat bottom) and flared bow design creates a super dry ride. But the real beauty of the Tropic 14 is its wide

beam, shallow draft, maximum fishable cockpit space, casting platform, and a ton of storage, designed for the tough demands of fishing or family excursions.

With her enhanced style and function, the Tropic 14 lines are easily distinguished from any other boat, even at a glance. While the Tropic 14 is packed with features, the rest is only limited by

your imagination. Add more seats, increase the size of the casting platform, add a rear platform, under floor storage, it's up to you. That's the power of imagination.

So whether you're standing on the gunnel or leaning on the throttle, the Tropic 14 provides the manoeuvrability and finesse of shallow flats angling for those with a serious focus

on fishing. And, for the fisherman who wants a serious boat that delivers the absolute best in safety, reliability, and angling adventure...think Tropic 14, and follow your dreams.

The rest is up to you!

## **Performance**

Freed of the constraints of an assembly line, BMD designs lightweight, rigorously-engineered boats that deliver speeds in the 25+ knot range, with emphasis on safety and ride.

This speed capability gives you the time and flexibility to do more boating, more fishing, not to mention the pride that
