

Lazercraft 740 HardTop

Here's something special - it's a big, powerfully built, Kiwi composite sportscruiser of plate alloy and GRP construction, working with a super-economical Steyr 240 diesel sterndrive. Beautifully built and finished, this deep vee sportsfisherman was born and bred in the Hauraki Gulf in NZ, and as F&B's Darren Shiel discovered, it doesn't get much better in trailerboat land, on this side of the Gulf, either.

Story by Darren Shiel, Pics By The F&B Camera Team
