*“Ain’t she sweet. . . just walkin’ on down the street . . .”* Now we’re going to ask YOU confidentially - ain’t she nice? Folks, this is one of the best boats we’ve tested in years. The concept might be about 80 years old, but the application for this little timber-trimmed GRP gem in today’s world of waterfront homes and canal estates is MORE appropriate than ever before. And it is one hell of a bay and estuary fishin’ boat, too. There’s only one problem we can see - you’ll never get rid of the grandkids with this rig !
