Floor tread Plate	.3mm
Bottom & transom	.5mm
Transom	.25" (single or twin)
Price (as tested)	\$109,000

You've got to hand it to the Kiwis - they sure have an eye for a sweet line and gentle curves in their boats - and this very swish Lazercraft 740 is a good example. With a fibreglass deck and cabin, on a tough plate alloy hull, the potential of this craft is considerable . . BUT . . Editor Peter Webster reckons they might be aiming their resources at the wrong market.
