

Horizon's 540 SeaBreeze Bow Rider

For a relatively small family company, the Horizon factory remains one of the most progressive in the aluminium boat building business. This year, they are stepping out on their own again, after several years building Horizons alongside the Savage Tropical range at their Burleigh Heads (QLD) factory. With interesting new models, the unbridled enthusiasm of the whole family and a growing band of very loyal Horizon fans, we were keen to test the 'new kid on the block' - the new **SeaBreeze 540**.
