SA's Nautic Star

7.6m RHIB

TBM's SA Editor Di Ross and photographer John Batty combine again to produce this very special report on another Nautic Star from Marko Bacic's increasingly diverse and highly regarded ally boat building factory in Adelaide.

Low, lean lines of this special RHIB disguise a tenacity and power that enable it to deal with extreme conditions, 24/7.

The low freeboard and side tubes are specifically designed to enable crew to reach over and down to the water, and haul heavy, possibly unconscious people from the water; think plane crash or boating accident in South Australia's gulfs and coastal waters.
