

Angler 215 Walkaround

Created by the talented hands of craftsman Steve Peake, the Angler 21 was conceived as the Archer 650 by Skippercraft, before Bundaberg boatbuilder Greg Franks took over the project. He moved the moulds to Bundy, contracted a delighted Steve Peake as design and building consultant, and has now swung this outstanding craft into full production.

The Angler 21 is a walkaround with an unusually big cabin. It has full length berths and easy sitting headroom. A big, deep s.d. cockpit for serious bluewater fishermen, plus an excellent live bait tank set-up, and fish lockers set into the sole. Packed with poured foam, the Angler is unsinkable, and features an exceptionally soft-riding, quiet hull, combining a centre 'plank', variable deadrise deep vee and chine venting - truly as close to the known state of design in production craft of this class, you will find. Perfect with 175-200hp outboards.

Specifications

Construction	GRP
Deadrise (transom).....	21°
Length (maximum overall)	6.50m
Length of hull	7.00m
BMT length for garage	8.70m
Height on trailer (to top of w/screen)	2.75m
Maximum beam.....	2.50m
Transom shaft length	(single) 25"
Sterndrive option	n/a
Weight, boat only	1150kg
Typical, est. BMT weight	2.1 tonne
Minimum horsepower	150hp
Maximum horsepower.....	230hp
Maximum outboard(s) weight	290kg
Number of people	Six
U/floor fuel tank capacity	240L
Standard water tank capacity (opt)	(opt)
Factory Location	Bundaberg, Qld

Base BMT package (from)	\$65's
Typical driveway, fitted price	\$75's
